

A REAL, DATED EXAMPLE

Four Pennsylvania mine records.

The public evidence, business contact route and service-fit context in one place. Use this sample to judge the research before considering the paid service.

WHAT THIS SAMPLE CONTAINS

4 distinct surface mines in Pennsylvania
Part 46 and Part 48 public-record examples
Official mine and violation identifiers
Public business contact pages checked September 13, 2026

Source snapshot: September 11, 2026. Selected records were issued August 18 - September 8, within the August 14 - September 10 research window.

Read the limitations first.

All four selected records show termination dates in the snapshot. They do not establish an unresolved training need or an intention to buy. Public contact pages are routing options, not verified decision-makers.

This is a four-record format example, not a current personalized delivery. No fifth record was added simply to fill a quota. Live MSHA status and your exact training scope need checking before outreach.

THE SAMPLE-FIRST PILOT

\$99 per month. Weekly PDF + CSV with up to 10 qualifying distinct-mine opportunities matched to the agreed territory and Part scope. Fewer when fewer qualify. No filler.

Request a free sample of up to 5 qualifying records. No card and no sales call required. After explicit sample acceptance and activation checks, payment is by secure monthly Stripe invoice. No automatic trial conversion or auto-charge.

Cancel before the next invoice. No long-term contract.

RECORDS 01 - 02

Evidence and a practical next step.

01 / PA / 30 CFR 48.27(a)(1)

Ellangowan Stripping

Reading Anthracite Company - Mahanoy City, PA

Public record: Citation 9606511, issued Sep 8, 2026. Mine ID 3608860. Surface mine; active in the snapshot.

Status in snapshot: Terminated Sep 8, 2026. No vacate date recorded. This is not a live-status check.

Possible fit: A Pennsylvania surface-mine record under Part 48. Relevant for a trainer who serves this area and this rule family; outside-training demand is unknown.

Public business route: [Operator corporate contact page](#). Published phone: 570-622-5150.

General corporate route, not a verified training buyer or decision-maker.

Neutral introduction angle: Offer a short overview of the Part 48 training services you actually provide, and ask whether the operator uses outside support. Do not suggest the terminated citation remains unresolved.

[Open MSHA lookup](#) - search Mine ID 3608860 and violation 9606511. See source and verification notes on page 4.

02 / PA / 30 CFR 46.5

Barletta Materials & Construction Inc

Barletta Materials & Construction Inc - Nescopeck, PA

Public record: Order 5155269, issued Sep 1, 2026. Mine ID 3604080. Surface mine; active in the snapshot.

Status in snapshot: Terminated Sep 3, 2026. No vacate date recorded. This is not a live-status check.

Possible fit: An active-in-snapshot Pennsylvania surface operation with a Part 46 record. Consider only if Part 46 and the Nescopeck area match the trainer's service scope.

Public business route: [Controller's named subsidiary listing](#). Published phone: 570-668-2040.

Corporate subsidiary office; training responsibilities and preferred contact channel are unverified.

Neutral introduction angle: Introduce the Part 46 training services you can deliver in this area and ask whether a brief written scope would be useful. The record does not establish an open training purchase.

[Open MSHA lookup](#) - search Mine ID 3604080 and violation 5155269. See source and verification notes on page 4.

RECORDS 03 - 04

Fit includes reasons to hold back.

03 / PA / 30 CFR 46.7

Locust Ridge Quarry

H&K Group Inc - Pocono Lake, PA

Public record: Citation 5078988, issued Aug 18, 2026. Mine ID 3607214. Surface mine; active in the snapshot.**Status in snapshot:** Terminated Aug 20, 2026. No vacate date recorded. This is not a live-status check.**Possible fit:** A Part 46 surface-quarry record in the Pocono Lake area. Existing internal training may reduce the fit for outside services; confirm before proposing work.**Public business route:** [Operator's named quarry page](#). Published phone: 570-218-3489.

Quarry/general inquiries route, not a confirmed training buyer. The site already publishes a visitor hazard-training process.

Neutral introduction angle: Ask whether outside Part 46 support is ever used for overflow or specialized needs. Acknowledge that the operator may already handle training internally.[Open MSHA lookup](#) - search Mine ID 3607214 and violation 5078988. See source and verification notes on page 4.

04 / PA / 30 CFR 46.7(a)

Meshoppen Stone Inc

Meshoppen Stone Inc - Meshoppen, PA

Public record: Order 5153098, issued Aug 18, 2026. Mine ID 3608880. Surface mine; active in the snapshot.**Status in snapshot:** Terminated Aug 18, 2026. No vacate date recorded. This is not a live-status check.**Possible fit:** A Pennsylvania surface-operation record under Part 46. Potential fit depends on the trainer's travel radius, subject competence and the operator's existing arrangements.**Public business route:** [Operator's public company page](#). Published phone: 800-836-1269.

General business route, not a confirmed training buyer or tested response channel.

Neutral introduction angle: Offer a concise description of relevant Part 46 services and ask whether written information should be directed to a training coordinator. Avoid implying an unresolved problem.[Open MSHA lookup](#) - search Mine ID 3608880 and violation 5153098. See source and verification notes on page 4.

HOW TO CHECK AND USE THIS

The source stays visible.

1. Check the official record.

Open the MSHA lookup, enter the Mine ID, and locate the exact violation number. Review current mine/operator information and whether the action has changed, been terminated, vacated or contested. If the lookup is unavailable, hold outreach rather than treating this sample as current.

2. Confirm service fit.

The trainer must actually serve the territory and applicable Part scope. A cited rule does not diagnose the operator's present training needs. Existing training staff or suppliers may make outside support unnecessary.

3. Use a public business route respectfully.

The linked company pages identify a general corporate or site route. No individual decision-maker, email deliverability or response was verified. Ask who handles outside training; do not imply government affiliation or threaten enforcement consequences.

4. Track useful outcomes.

Record whether a route works, whether the mine fits your services and whether the operator uses outside training. Tell us when a record is out of scope so the next delivery can be corrected. This product supplies research; you decide whether and how to approach an operator.

SOURCE AND VERIFICATION NOTES

[MSHA Open Government Data](#) provides the downloadable records. This sample was matched directly against the preserved September 11 Violations.txt and Mines.txt files. Each selected violation was issued to the named operator, not a contractor.

[Violations download](#) / [Mines download](#) / [MSHA record lookup](#)

The live MSHA lookup was not independently completed during this sample rebuild. Business contact routes were checked separately on September 13. Contact information and record status can change; company-page availability is not proof of a working response channel.
